

# FLUID DETAILS

- // 3/8" / 10 mm tempered clear glass panels
- // Rolling mechanism - 2 3/16" diameter
- // Frameless design
- // Multiple configurations available, see below for details
- // Door is completely reversible for all alcove applications, although we recommend to place door on the same side as the shower fixtures
- // Door closes against the return panel for all corner applications
- // Alcove application ships with 2 boxes (1 for door & fixed panel & 1 for hardware)
- // Corner application ships with 3 boxes (1 for door & fixed panel, 1 return panel & 1 for hardware)
- // For certain return panel sizes, Acryline does not carry corresponding acrylic bases. These configurations require custom tiled bases\* (see pricing section for available base sizes).

\*Min. threshold width required is 3". Please contact Acryline for details before beginning construction of base to ensure compatibility with doors.
